Little Potato

CUCUMBER

True-to-Type

Packed for 2021,
Sell by 10/31/21
OG1575-2431 (25 seeds)

1575A - **Little Potato** (*Cucumis sativus*)

(aka Khira Balam) Originally from India. Introduced into the 1997 SSE Yearbook by Indiana member Robert F. Bruns who got his seed from the USDA. Nearly round 3" fruits with brown russeted skin are borne heavily on robust semi-bush plants. Delicious lemon flavor. Stays crisp in storage. 70 days.

To 3-4 Plants

Light
Full Sun

Instructions- Sow seeds outdoors in 12" diameter hills after the last frost when soil is warm. Space hills 6' apart in all directions. Can also be started indoors 2-4 weeks before the last frost for an earlier harvest. Cucumbers benefit from consistent moisture. Provide support for vines to save space.

Parade

CUCUMBER

Packed for 2021,
Sell by 10/31/21
OG112-2113 (25 Seeds)

0112A - **Parade** (*Cucumis sativus*)

Popular Russian variety. Heavy set of uniform fruits that mature at relatively the same time, making it a good processing variety. Fruits are 5" long by 2" in diameter, one of our favorites at Heritage Farm. Resistant to extreme weather conditions. 50-60 days.

Learn To Grow It

Seeds to Hill
6-8 Seeds

Thin
To 3-4 Plants

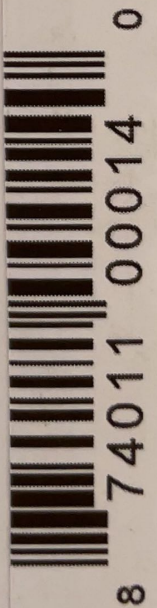

Light
Full Sun

Instructions- When growing plants on a trellis, space seed 6-8" apart and thin plants as necessary; train plants to climb the trellis with an initial guidance. Alternatively, make 12" hills at least 6' apart. Plant 6-8 cucumber seeds per hill 1" deep. After germination, thin to 3-4 plants per hill. Can also be started indoors 2-4 weeks before last frost. Cucumbers benefit from steady moisture.

Aunt Molly's

GROUND CHERRY

America's Garden Sweetheart

Packed for 2021,
Sell by 10/31/21
OG0912-4895 (50 seeds)

0912A - **Aunt Molly's** (*Physalis grisea*)

Easy-to-grow, prolific, and super-sweet, this ground cherry works well for preserves and pies, over ice cream, and in fresh-fruit salads—or can simply be eaten straight out of the garden. The plants have a sprawling habit and produce ½-¾" fruits encased in a papery husk that turns brown when the fruits ripen. This beloved variety takes its name from an ice cream stand, named not for a dear aunt, but for a cherished pet dog of the owners of Territorial Seed.

Learn To Grow It

| Start Indoors | Germination | Plant | Light |
|------------------------------|-------------|---------------------------------|----------|
| 6 Weeks before last frost | 14 Days | Outdoors 12-18" Apart | Full sun |

Instructions- Sow seeds indoors ¼" deep. Transplant outdoors when the danger of frost has passed. Growing ground cherries on landscape cloth suppresses weeds and makes collecting the fruits easier. Fruits can be stored in husks for 3-4 weeks.

Minnesota Midget

MELON

Container- and Cool Climate-Friendly

Packed for 2021,
Sell by 10/31/21
0362-4593 (25 seeds)

0362 - **Minnesota Midget** (*Cucumis melo*)

Historic variety - Introduced to the U.S. seed trade before 1950

This extra-early variety was bred by the University of Minnesota at St. Paul in 1948 and introduced by Farmer Seed and Nursery Company. It is capable of producing two crops, making it an excellent choice for northern gardeners. The vines seldom grow over 3' long, so the variety is also suitable for growing in containers. It produces round 4" fruits with thick, golden-yellow flesh that is edible to the rind and deliciously sweet. Resistant to fusarium wilt. 60-75 days.

SUNBERRY

Forecast: Sunny and Slightly Sweet

Packed for 2021,
Sell by 10/31/21
OG1045-3930 (50 seeds)

1045A - **Sunberry** (*Solanum burbankii*)

Historic variety - Introduced to the U.S. seed trade before 1950

(aka Wonderberry) Apparently bred by Luther Burbank in the early 1900s; distributed by John Lewis Childs as Wonderberry. Great controversy ensued over the plant's provenance and true identity, and Burbank's reputation was badly damaged. Prolific bushy plants loaded with small, slightly sweet, dull-blue berries. 50-75 days.

Learn To Grow It

| Start Indoors | Germination | Plant | Light |
|------------------------------|-------------|-----------------------|-------------|
| 6 Weeks before last frost | 14-21 Days | Outdoors 24" Apart | Full Sun |

Instructions- Sow seeds indoors ¼" deep. Transplant outdoors 24" apart in rows 36" apart. Sunberries tolerate a wide variety of climates and conditions, but do not tolerate frost. Plants are self-supporting, but sprawl over a large area. Cage or trellis when space is limited.
